

TI_2202: Heavy duty LED optics

SCC & iCombi

13/09/2022

Subject

In the course of RATIONAL quality assurance, it was found that certain applications have an unintended impact on the service life of the standard LED optics. In light of this, RATIONAL has developed a specified, more robust heavy duty LED optic. The heavy duty LED optics are now available as a service part.

Please note that the standard LED optics is not being replaced by the heavy duty LED optics.

Affected product/accessories

SelfCookingCenter; iCombi Pro; iCombi Classic

Affected components

Unit range	Unit size	Article number
SelfCookingCenter	6-2/3	40.07.586S
iCombi Pro	6-2/3 20-1/1 20-2/1	
iCombi Classic	6-1/1 6-2/1 10-1/1 10-2/1	
iCombi Pro	6-1/1 6-2/1	
iCombi Classic	20-1/1 20-2/1	40.07.590S
iCombi Pro	10-1/1 10-2/1	
SelfCookingCenter	6-1/1 6-2/1 20-1/1 20-2/1	40.07.596S
	10-1/1 10-2/1	40.07.599S

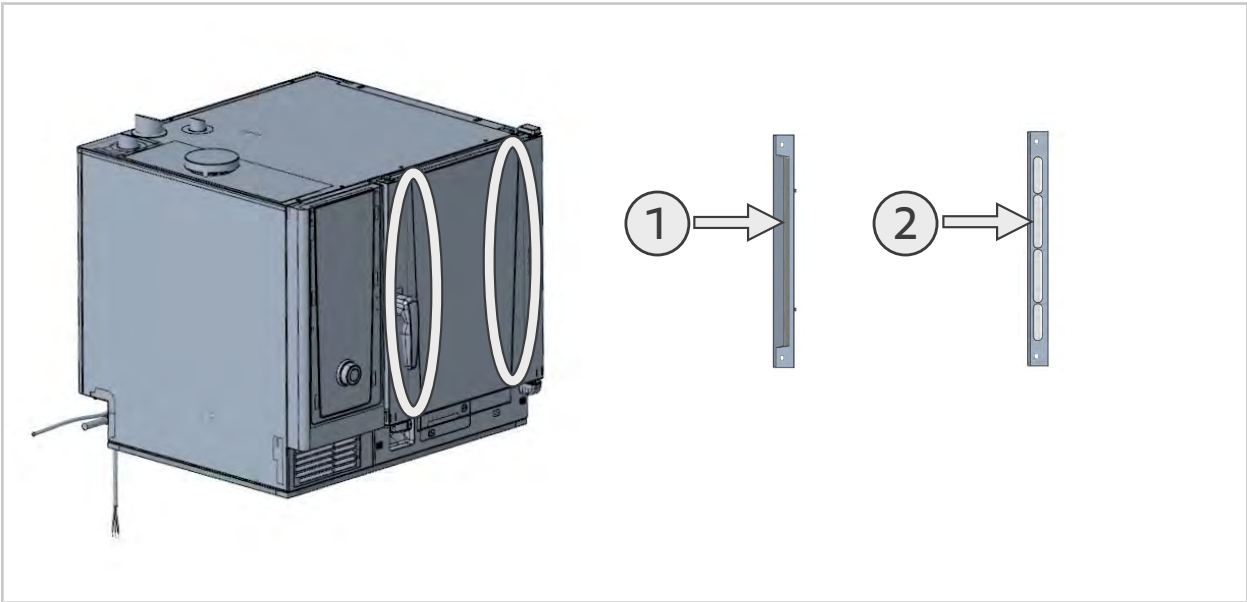

General information

The heavy duty LED optics have a higher stiffness compared to the LED optics (standard). The heavy duty LED optics are also more resistant to cleaning chemicals and fats at constant high operating temperatures.

Notice:

The heavy duty LED optics have limited level lighting.

Location

1	LED optics (standard)
2	Heavy duty LED optics
