

TI_2215: Adjustment drain hose iCombi 20-2/1

iCombi 20-2/1

21/07/2023

Topics

Due to a component change, the drain hose DG 20-2/1 made of silicone (Art. no.: 44.02.797S) is to be replaced with a new drain hose steam generator 20-2/1 with ring corrugation (Art. no.: 44.02.223S).

Affected product/accessories

iCombi Pro; iCombi Classic:

- 20-2/1

Affected components

Component	Article number
Drain hose steam generator 20-2/1 (old)	44.02.797S
Drain hose steam generator (corrugated hose) 20-2/1 (new)	44.02.223S

General information

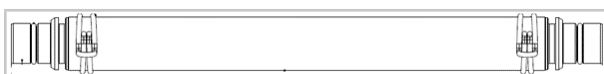

The new corrugated drain hose steam generator reduces the force applied to the pump connection fitting.

The "new" drain hose DG with ring corrugation also has a higher strength at the connection points.

New as-delivered condition of the SG drain hose with ring corrugation:

Previously used drain hose DG made of silicone:

Revision Log

Changes from previous version of this manual:

- General information: The new corrugated drain hose steam generator reduces the force applied to the pump connection fitting.

NOTE:

No further action is required.
