

TI_2320: ConnectedCooking registration process

22/04/2026

Topic

We now offer our customers another option for connecting their cooking system with ConnectedCooking.

In addition to **logging in with an existing ConnectedCooking account**, our customers now have the option of registering the cooking system **anonymously with ConnectedCooking**.

This allows customers to use the automatic software update without having to create their own account.

Affected product/accessories

ConnectedCooking

- iCombi Pro

Use of anonymous registration:

Only if

- connection to a ConnectedCooking customer account is not possible or
- is not desired by the customer

can anonymous registration be selected.

Important:

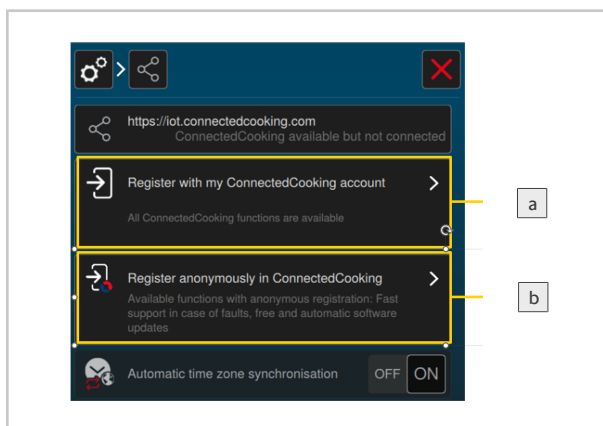

Our customers benefit **more** from **anonymous registration** than with **no registration**.

Greatest customer and partner benefit

The **greatest benefit** is achieved when the units are connected to a **customer account** and have invited a service partner account.

Registration options

- Log in with an existing customer ConnectedCooking account
- Login without your own ConnectedCooking account. Anonymous registration with RATIONAL AG account

NOTICE

A stable Internet connection is required for successful login to ConnectedCooking.
