

TI_2401: Adaptation of pump mount steam generator gas

 iCombi Pro & iCombi Classic Gas 6-1/1
- 10-1/1 - 20-1/1

 ---

 ---

 01.02.2024

Topic

Due to the design adjustment of the steam generator, the pump housing is now rotated 10° less during installation.

NOTICE! Always turn the housing until it reaches the end stop.

This adjustment prevents the pump from coming into contact with other components and thus exerting pressure on the pump housing.

Already installed steam generators do not need to be actively replaced.

The article number remains unchanged.

Affected product/accessories

- iCombi Pro & iCombi Classic Gas
- 6-1/1
 - 10-1/1
 - 20-1/1

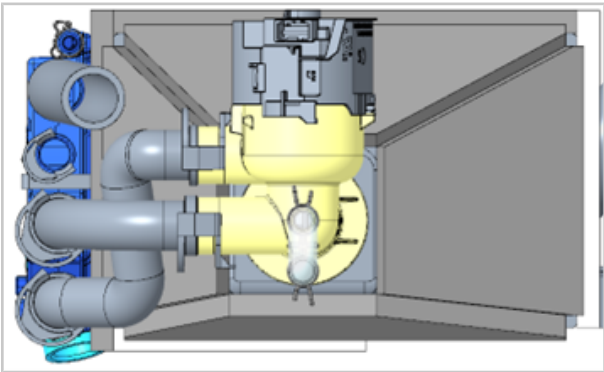

Affected components

Component	Article number
Steam generator insulated 6 1/1	87.01.550S
Steam generator insulated 10 1/1	87.01.552S
Steam generator insulated 20 1/1	87.01.626S
