

Topic

The design adaptation of the gas distributor ensures that the gas distributor is easier to install.
From now on, only the new adapted gas distributors from RATIONAL will be installed and shipped (service parts).
Gas distributors already in stock can be installed.
Already installed gas distributors do not need to be replaced.
NOTICE! Furthermore, a leakage and flue gas test must be carried out after each replacement of gas components.

Affected product/accessories

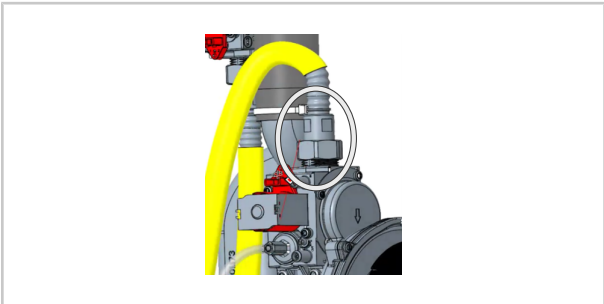

- iCombi Pro / iCombi Classic Gas
- 10-1/1

Affected components

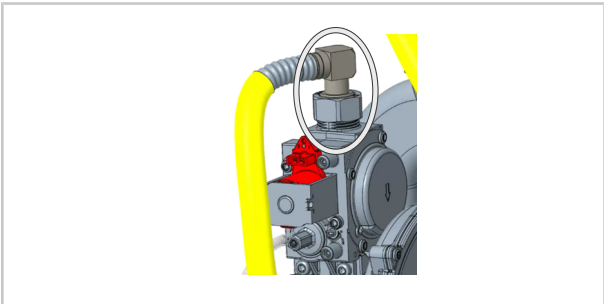

Component	Article number
Gas distributor	70.01.607S
