

TI_2513: Adaptation of the WiFi module iCombi Classic

Topic

To ensure compliance with the RED regulations (Radio Equipment Directive - Directive 2014/53/EU), we have adapted the WiFi module for the iCombi Classic.

This change has already been implemented for units from August 2025.

The change does not affect the compatibility of your existing service parts. These can still be installed without problems.

The service parts, including the change of the article number, only affect Europe for the time being.

No active component replacement is required here.

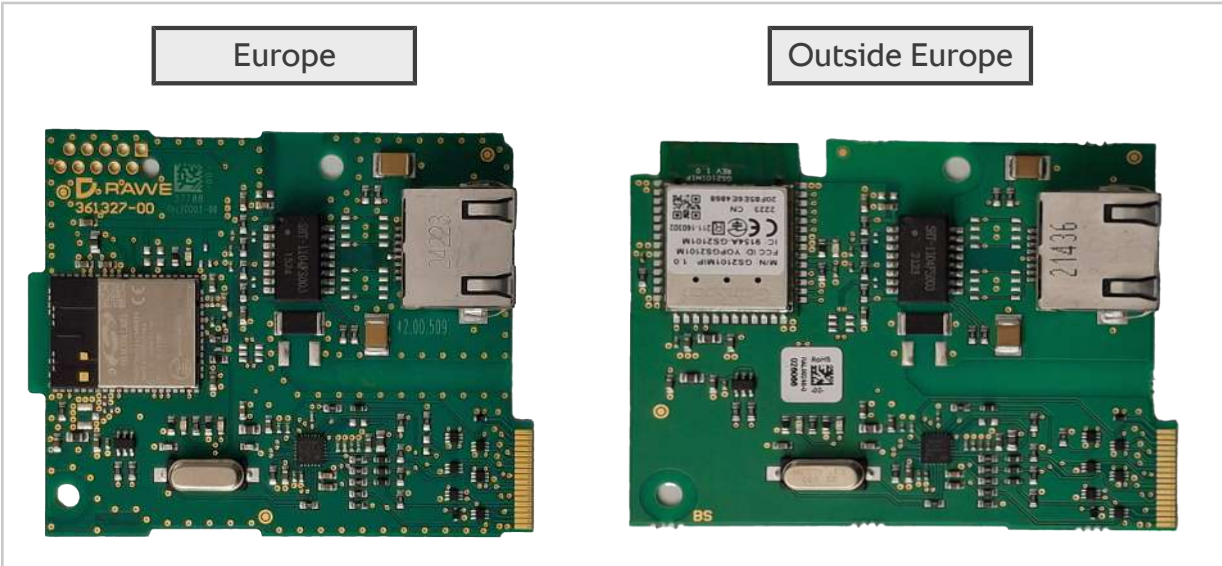

Affected product/accessories

iCombi Classic electric units and gas units

- 6-1/1
- 6-2/1
- 10-1/1
- 10-2/1
- 20-1/1
- 20-2/1

Required components

Description	Article number (Europe)	Article number (outside Europe)
LAN/WiFi network board	42.00.509P	42.00.294P
Retrofit kit network board LAN/WiFi	87.02.082S	87.02.032S

NOTE:

No further action is required.
