

TI_2514 Stand I update for iCombi Pro XS

SelfCookingCenter XS, CombiMaster Plus 6-2/3, iCombi Pro 6-2/3

24/09/2025

Topic

We would like to inform you that we are now able to offer you two improved mobile stands for your iCombi Pro XS. These replace the previous stands with the same item number.

Affected product/accessories

- SelfCookingCenter XS
- CombiMaster Plus 6-2/3
- iCombiPro 6-2/3

Affected components

Component	Item number
Stand UG I for type XS 6-2/3	60.31.169
Stand UG I for Combi-Duo type XS 6-2/3	60.31.170

General information

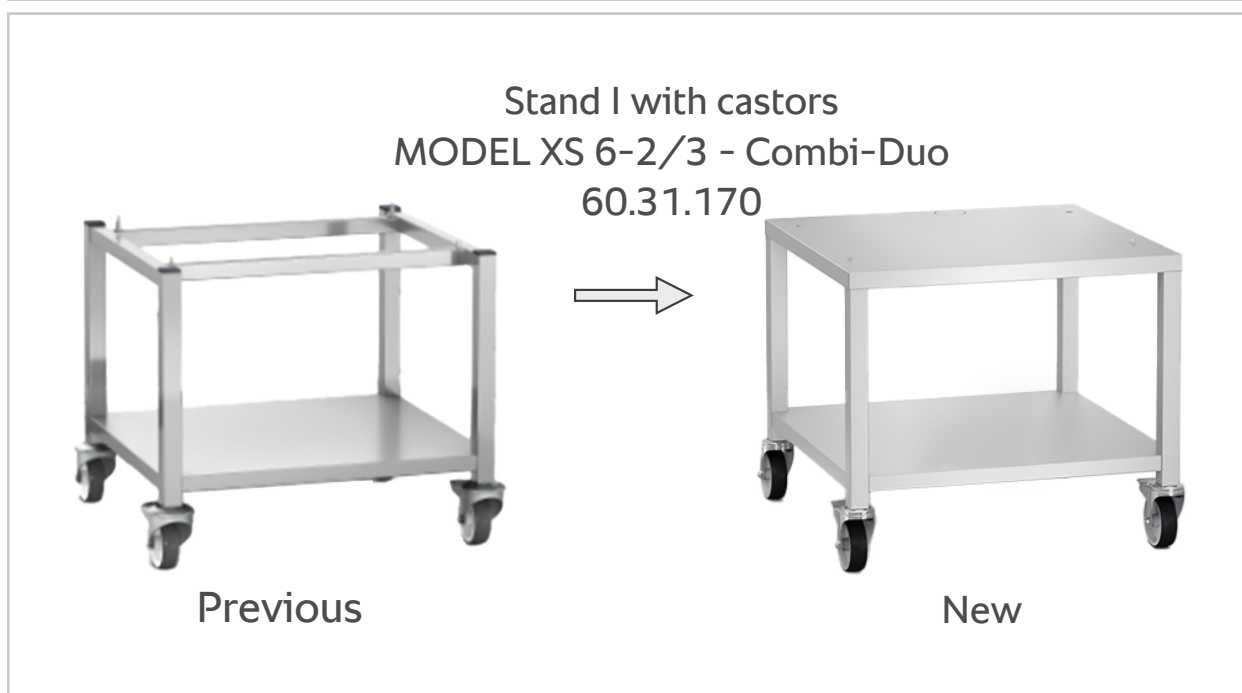

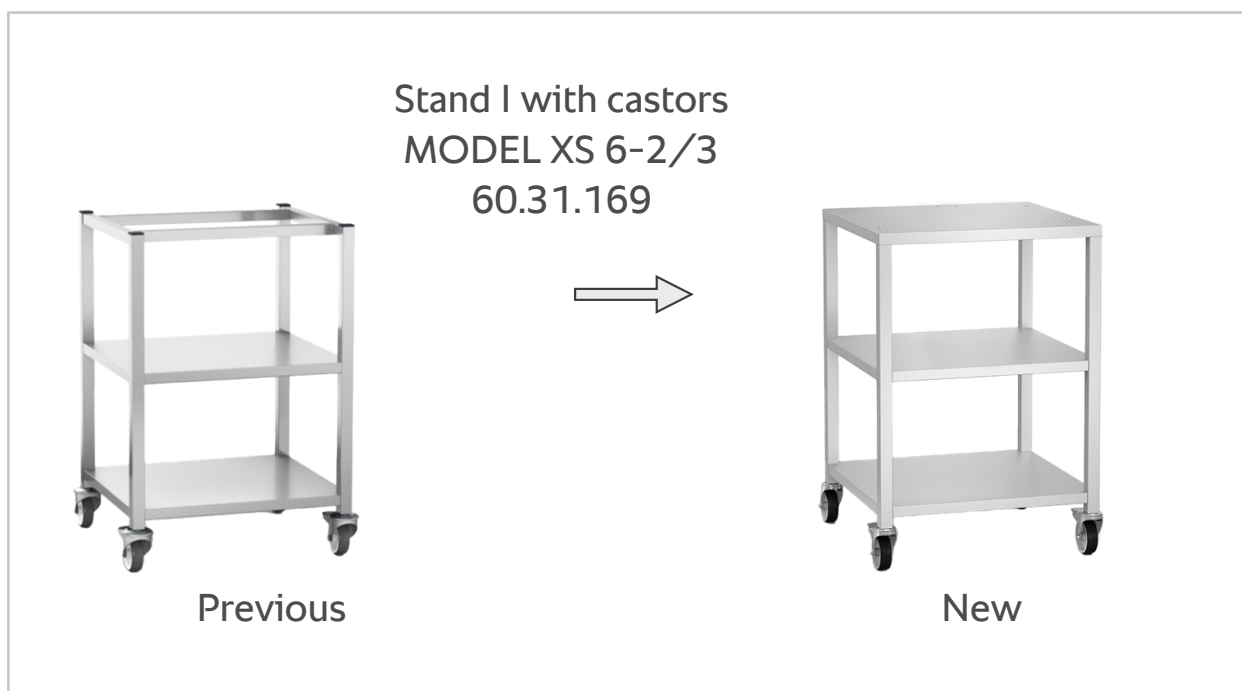

The main changes compared to the predecessor items are:

- A stainless steel base for stable installation of the iCombi Pro XS
- A perforated opening in the installation floor for professional piping
- Minor change in dimensions

Due to the newly added stainless steel base, access to the components located in the unit base is restricted and the unit will always have to be dismantled from the stand in the future.

Please keep this in mind for future service visits.
