

TI_2609: RATIONAL USB stick

All unit generations from SCC/CMP (09/2011)

07/07/2026

Topic

This technical information provides you with an overview of the RATIONAL USB sticks for technical service, which will be available from **July**.

Affected product/accessories

The RATIONAL USB stick is compatible with all generations of units **from** the SelfCookingCenter whiteefficiency / 5Senses and CombiMaster Plus models onwards (from 09/2011).

Valid

This Technical Information sheet replaces Technical Information sheet **TI_2106**.

Technical Information sheet **TI_2106** is no longer valid and is no longer available.

General information

From **July 2026**, all orders for a RATIONAL USB stick will be supplied with the RATIONAL USB stick currently shown. The article number of the ordered USB stick is not relevant.

Discontinued USB sticks

The following black USB sticks are no longer available:

- Art. no. 42.00.386
- Art. no. 87.01.857
- Art. no. 87.01.275

The supplier has discontinued these USB sticks without replacement due to outdated technology.

Technical features

The chip technology currently supplied has been tested on all unit generations. Both data uploads and data downloads are possible on all units.

Procedure in case of incompatibility

- ✓ You discover that the RATIONAL USB stick is incompatible with the market.
 1. Contact your RATIONAL Technical Manager.
 2. Provide information about the inserted USB stick.
 3. State the unit type.
 4. Upload images of the PCB to which the USB stick was connected.
 5. Describe the action performed.
- >> The information is then analysed or forwarded by the RATIONAL Technical Manager.
